The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election without traverse of group I and species c, claims 1-18 and 21-23 in the reply filed on 12/28/05 is acknowledged. Claims 29 and 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 6, 8-10, 12-15 and 21-23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fortunko (US Patent # 4,711,152). Fortunko discloses the claimed system and method for utilizing the system for programming a fuze comprising a fuze having a (radio frequency) receiver/transceiver, a fuze setter having a (radio frequency) transmitter/transceiver, wherein pre-launch fuze setting data is transmitted from the transmitter to the receiver via an RF electromagnetic signal. The fuze setter further comprises an inductive transmitter, a magnetic transducer. It is noted that the phrase "may be", in the claims, is an optional phrase and does not thereby *require* the limitation. The fuze setting data is transmitted via a frequency modulated carrier signal using frequency shift keying. The transmitter comprises a level shifter, a modulation circuit and an antenna and a digital to analog converter. At least 1,000 bits/second may be transmitted. It is noted that the [a)statements of intended use or field of use, b)"adapted to" or "adapted for" clauses, c) "wherein" clauses, or d) "whereby"]clauses are essentially

Art Unit: 3641

method limitations or statements of intended or desired use. Thus, these claims as well as other statements of intended use do not serve to patentably distinguish the claimed structure over that of the reference. See In re Pearson, 181 USPQ 641; In re Yanush, 177 USPQ 705; In re Finsterwalder, 168 USPQ 530; In re Casey, 512 USPQ 235; In re Otto, 136 USPQ 458; Ex parte Masham, 2 USPQ 2nd 1647.

See MPEP § 2114 which states:

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from the prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ 2nd 1647

Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than functions. In re Danly, 120 USPQ 528, 531.

Apparatus claims cover what a device is not what a device does. Hewlett-Packard Co. v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528.

As set forth in MPEP § 2115, a recitation in a claim to the material or article worked upon does not serve to limit an apparatus claim.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 4, 11, and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fortunko as applied to claims 1 and 5 above. Fortunko discloses the claimed invention except for the express optimum bits/second and distance of the transmitter from the receiver. It would have been obvious to one of ordinary skill in the art at the time the invention was made to

Application/Control Number: 10/733,499

Art Unit: 3641

optimum distance from the receiver, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges and discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Aller*, 105 USPQ 233 and *In re Boesch*, 617 F.2d 272.

Page 4

5. Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fortunko as applied to claims 1, 5 and 6 above, and further in view of Keil et al. (US Patent # 6,176,168). Although Fortunko does not expressly disclose they system wherein the fuze further inclused a transmitter and the fuze setter including a receiver and a talkback signal sent from the fuze transceiver to the fuze setter transceiver, Keil et al. does. Keil et al. teaches an improved circuitry for a system wherein a fuze has a receiver and a transmitter and a fuze setter has a receiver and transmitter, wherein pre-launch fuze setting data is transmitted to the fuze and a talkback signal is sent from the fuze to the fuze setter in order to improve communication between the fuze and the fuze setter. Keil et al. and Fortunko are analogous art because they are from the same field of endeavor: fuze setting. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the talkback features as taught by Keil et al. with the system as taught by Fortunko. The suggestion/motivation for doing so would have been to obtain a fuze setting system that could effectively communicate between the fuze and the setter.

Application/Control Number: 10/733,499

Art Unit: 3641

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Becker et al. (US Patent # 4,979,424), Mayersak (US Patent # 5,866,838), and Beck (US Patent # 4,454,815).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle (Shelley) Clement whose telephone number is 571.272.6884. The examiner can normally be reached on Monday thru Thursday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 571.272.6873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
